Amendments to the Claims:

This listing of claims replaces all previous versions, and listings, of the claims in this

application.

Listing of the Claims:

(cancelled)

2. (cancelled)

3. (cancelled).

4. (cancelled).

5. (original) An infrared-reflective roofing product comprising:

(a) a fibrous web coated with a bituminous coating forming a bitumen-coated

web,

(b) a coating of at least one powder of an infrared-reflective material applied to

the bitumen-coated web, and

(c) roofing granules applied to the bitumen-coated web.

6. (original) An infrared-reflective roofing product according to claim 5 wherein the roofing

granules comprise infrared-reflective roofing granules.

7. (original) An infrared-reflective roofing product according to claim 5 wherein the at least

one powder is selected from the group consisting of titanium dioxide pigments, nickel titanate

pigments, chrome titanate pigments, nano-TiO₂ particles, light-interference platelet pigments.

pearlescent pigments, metal-oxide coated substrate pigments, iron oxide yellow pigments, iron

titanium oxides, metal flakes, silica encapsulated metal flakes, light-scattering pigments, and

mirrorized fillers.

 $8. \ \, \hbox{(original)} \quad \hbox{An infrared-reflective roofing product according to claim 5 having an L^* value}\\$

of less than 60 and a solar heat reflectance of greater than 25 percent.

9. (cancelled)

10. (cancelled)

11. (cancelled)

12. (cancelled).

13. (cancelled)

14. (original) An infrared-reflective product comprising:

 (a) a fibrous web coated with a bituminous coating forming a bitumen-coated web.

 (b) a coating material including a carrier and at least one powder of an infraredreflective material applied to the bitumen-coated web, and

(c) roofing granules applied to the bitumen-coated web.

15. (original) An infrared-reflective roofing product according to claim 14 wherein the roofing granules comprise infrared-reflective roofing granules.

16. (original) An infrared-reflective roofing product according to claim 14 wherein the at least one powder is selected from the group consisting of titanium dioxide pigments, nickel titanate pigments, chrome titanate pigments, nano-TiO₂ particles, light-interference platelet pigments, pearlescent pigments, metal-oxide coated substrate pigments, iron oxide yellow pigments, iron titanium oxides, metal flakes, silica encapsulated metal flakes, light-scattering pigments, and mirrorized fillers.

17. (original) An infrared-reflective roofing product according to claim 14 having an L* value of less than 55 and a solar heat reflectance of greater than 25 percent.

18. (cancelled)

web.

23. (original) An infrared-reflective roofing product comprising:

(a) a fibrous web coated with a bituminous coating forming a bitumen-coated

(b) a coating film including a film carrier and at least one powder of an infrared-

reflective material applied to the bitumen-coated web, and

(c) roofing granules applied to the bitumen-coated web.

24. (original) An infrared-reflective roofing product according to claim 23 wherein the roofing

granules comprise infrared-reflective roofing granules.

25. (original) An infrared-reflective roofing product according to claim 23 wherein the at

least one powder is selected from the group consisting of titanium dioxide pigments, nickel titanate pigments, chrome titanate pigments, nano-TiO₂ particles, light-interference platelet

and the pigments, of the training pigments, that is the z particles, light interference plates.

pigments, pearlescent pigments, metal-oxide coated substrate pigments, iron oxide yellow

pigments, iron titanium oxides, metal flakes, silica encapsulated metal flakes, light-scattering

pigments, and mirrorized fillers.

26. (original) An infrared-reflective roofing product according to claim 23 having an L* value

of less than 60 and a solar heat reflectance of greater than 25 percent.

27. (cancelled)

28. (cancelled)

29. (cancelled)

30. (cancelled)

31. (cancelled)

32. (original) An infrared-reflective product comprising:

Appln. No. 10/749,680 October 10, 2007

Page 7

(a) a fibrous web coated with a bituminous coating forming a bitumen-coated

web,

(b) a coating web including a web carrier, at least one powder of an infrared-

reflective material and roofing granules, the coating web being applied to the bitumen-coated

web.

33. (original) An infrared-reflective roofing product according to claim 32 wherein the roofing

granules comprise infrared-reflective roofing granules.

34. (original) An infrared-reflective roofing product according to claim 32 wherein the at

least one powder is selected from the group consisting of titanium dioxide pigments, nickel

titanate pigments, chrome titanate pigments, nano-TiO $_2$ particles, light-interference platelet

pigments, pearlescent pigments, metal-oxide coated substrate pigments, iron oxide yellow

pigments, iron titanium oxides, metal flakes, silica encapsulated metal flakes, light-scattering

pigments, and mirrorized fillers.

35. (original) An infrared-reflective roofing product according to claim 32 having an L* value

of less than 60 and a solar heat reflectance of greater than 25 percent.

36. (cancelled)

37. (cancelled)

38. (cancelled)

39. (cancelled)

40. (cancelled)

41. (original) An infrared-reflective roofing product comprising:

(a) a fibrous web coated with a bituminous coating forming a bitumen-coated

web.

Appln. No. 10/749,680 October 10, 2007

 roofing granules applied to the bitumen-coated web to form an intermediate product, and

(c) a coating film including a film carrier and at least one powder of an infraredreflective material applied to the intermediate product.

42. (original) An infrared-reflective roofing product according to claim 41 wherein the roofing granules comprise infrared-reflective roofing granules.

43. (original) An infrared-reflective, deep-tone roofing product according to claim 41 wherein the at least one powder is selected from the group consisting of titanium dioxide pigments, nickel titanate pigments, chrome titanate pigments, nano-TiO₂ particles, light-interference platelet pigments, pearlescent pigments, metal-oxide coated substrate pigments, iron oxide yellow pigments, iron titanium oxides, metal flakes, silica encapsulated metal flakes, light-scattering pigments, and mirrorized fillers.

44. (original) An infrared-reflective roofing product according to claim 41 having an L* value of less than 60 and a solar heat reflectance of greater than 25 percent.
